

GLASSGUARD™ CARE AND MAINTENANCE

GLASSGUARD™ is a true break through in shower glass protection. Much like a “non-stick” coating on a pot or pan, GLASSGUARD™ dramatically reduces the time and effort required to clean shower glass. While shower glass will still need to be cleaned from time to time, GLASSGUARD™ makes the cleaning job easier!

To maintain GLASSGUARD™ treated shower glass simply spray cool, clean water along the top edge of the glass with a shower head or pour water with a cup. For best results avoid using hot water. Most soapy residue will run right off. Periodic rubbing with a nylon mesh puff will easily remove any buildup that has occurred. If desired, dry glass with a microfiber towel. A microfiber towel is preferred to a squeegee as it leaves no streaks; just a clean, spotless shine.

Without periodic cleaning, water spots will eventually appear and hard water conditions may build up requiring more frequent cleaning; however, these spots are easily removed with cool, clean water and a nylon mesh puff. Occasional application of GLASSGUARD™ Revitalizer restores the full hydrophobic action to GLASSGUARD™ treated surfaces; plus, has the added benefit of protecting metal, vinyl, and plastic portions of the shower enclosure. Even if the surface has been neglected and significantly stained the glass is still protected! Stubborn build up can be removed using our Ultimate Hardwater Stain Remover, “glass safe” scrubber pad, and GLASSGUARD™ Revitalizer; thus, restoring the glass to its original easy to maintain condition. Follow labels as instructed, keeping in mind a very small amount goes a long way!

MANUFACTURER MAINTENANCE RECOMMENDATIONS TO MAXIMIZE PERFORMANCE AND BENEFIT OF SURFACES TREATED WITH GLASSGUARD™ DIAMON-FUSION®

After Each Use: Rinse or spray the surface with cool (for best results), clean water. Wipe it dry or let the water drain off, and pat dry the few remaining droplets with a microfiber towel. You may also use a squeegee.

Once a Month: Wet the surface and use a nylon mesh puff to go over the wet surface, rubbing in a circular motion. You should feel the places that are “sticky” going back to slick again. Then rinse or spray the surface with cool, clean water just as you do after each use. Wipe it dry or let the water drain off, and pat dry the few remaining droplets with a microfiber towel.

**If You Haven't Followed the Basic Manufacturer Maintenance Recommendations:
The Consumer Maintenance Kits can be used to bring back your GLASSGUARD™
Diamon-Fusion® coating to like new performance.**

ABOUT GLASSGUARD™

GLASSGUARD™ is a permanent protective bonding agent that becomes part of the entire glass surface itself. This two step process is factory applied to all sides of the glass using a state of the art environmentally controlled vapor fusion chamber.

Step 1 uses Nano-technology to permanently change the glass surface. It is not a sealant. GLASSGUARD™ cannot be washed away!

Step 2 makes it even better by capping Step 1 with an additional surface that is hydrophobic, and can be revitalized for the life of the door. Water repels from the surface! Much like a non-stick pan in the kitchen, hard water minerals, dirt and other contaminants cannot permanently stick or cause damage to shower doors. Glass is easily cleaned by merely rinsing with cool, clean water and the occasional use of a nylon mesh puff. No need for harsh chemicals or abrasives!

These GLASSGUARD™ products and simple procedures were designed to help you enjoy many years of easily maintained shower enclosures. For more information or refills, contact your local GLASSGUARD™ dealer.

- *Makes basic maintenance even easier* • *Protects your investment* •
- *Saves time, effort, and money* • *No more harsh cleaning chemicals needed!* •

Consumer Maintenance Kit

- 16 oz. Bottle Revitalizer
- (3) Restoration Powder NanoPax®
 - Nylon Mesh Puff
 - White Scrubber Pad
 - Microfiber Towel

Express Care Kit

- Nylon Mesh Puff
- White Scrubber Pad
- Microfiber Towel
- (5) Revitalizer NanoPax®
- (1) Restoration Powder NanoPax®

4 oz. Revitalizer Bottle

- Revitalizes & Protects GLASSGUARD™ Treated Surfaces
- Seals & Protects Glass, Porcelain & Ceramic Tile
- Prevents Mineral Build-up
- Restricts Soap Scum & Spotting

These GLASSGUARD™ products and simple procedures were designed to help you enjoy many years of easily maintained shower enclosures. For more information or refills contact your local GLASSGUARD™ dealer.
